## Floor Case

The minimal and stylish design gives the Case products a strong architectural impression. As we see it, these magazine holders should be seen as a part of the surrounding architecture. The impression gets even stronger when repeated in larger amounts or groups.

Material: Epoxy coated steel

Standard colours: Black, silver and glossy white

**CASE** - design Mikko Laakkonen

## Wall Case

The Wall Case is a convenient and stylish way to store your magazines on the wall. The cover graphics of magazines tend to be strong and colourful and can therefore be restless in larger amounts. Case hides them partially, making the total surrounding more peaceful.

Material: Epoxy coated steel  
 Standard colours: Black, silver and glossy white

## Ad Case

The main focus in the new brochure holder is to keep a maximum area of the brochures visible, giving out as much information as possible. As the magazine holders, the brochure holder should also be seen as a part of the surrounding architecture. Ad Case looks good in single units or in bigger dynamic groups.

Material: Epoxy coated steel  
 Standard colours: Black, silver and glossy white
